

# Dive Into Our In-Depth Report!

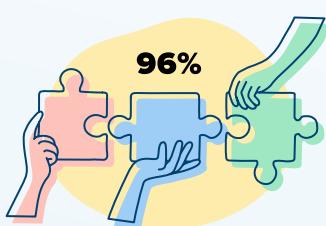

## Education Insights 2024-2025: Learning Today, Leading Tomorrow

Discovery Education partnered with The Harris Poll, a leading research organization, to gather authentic viewpoints from K-12 superintendents, teachers, parents, and students. This report offers new insights into the current state of education.

### What We Discovered

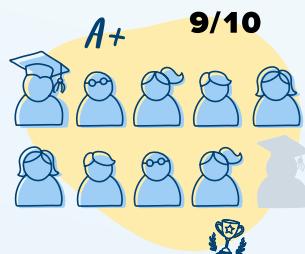

#### Positive Pulse

Teachers are passionate about their impact, creating meaningful educational experiences every day. Schools are actively fostering inclusive environments where students and parents feel valued and heard.

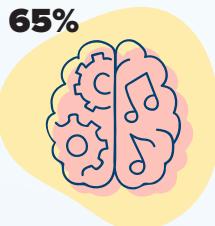

96% of all teachers report making **meaningful connections** with students.

About 90% of students are **motivated to learn, work hard, and care** about their grades.

#### Emerging Challenges

Amidst this progress, challenges in student engagement and future readiness persist. Capturing student interest and closing learning gaps requires ongoing effort.

Over 65% of students believe **education isn't evolving to meet workplace needs**, raising concerns about the career and life readiness of future graduates.

Two-thirds of teachers feel that students **exhibit a wider range of knowledge and skills** compared to 2019. This increases the workload for educators as they strive to meet each student where they are.

### Be Part of the Conversation

Explore how educators are navigating today's evolving educational landscape and uncover key data that highlights opportunities for advocacy and support to enrich student learning.
